IDENTIFIERS	Colorado

ABSTRACT

This basic vocational related skills assessment module in child care is one of sixteen modules designed to help teachers assess and identify some of the areas in which special needs students may encounter learning difficulties. The materials in the module allow for informal assessment in three basic areas: academic skills, motor skills, and vocational interest and awareness. The basic skills assessment includes reading skills, listening skills, using a book to locate information, and mathematics. The reading section offers materials written at two different reading levels: the first paragraph is easy (4-8), while the second paragraph is more difficult (9-12). The motor skills are assessed through teacher observation and recording on a matrices skills checklist. The third area, vocational interest and awareness, is assessed through a vocational awareness questionnaire completed by students. (LRA)

DESIGN AND IMPLEMENTATION OF AN ASSESSMENT MODEL FOR STUDENTS ENTERING VOCATIONAL EDUCATION PROGRAMS IN THE STATE OF COLORADO

Each learner should be considered as unique. All students have unique characteristics which are considered by alert teachers in their efforts to foster more effective learning. This is especially true in vocational programs where our opportunities to know each learner are greater than in some other classroom situations.

Douglas Towne
Sydney Wallace

The purpose of this project was to develop materials that could be utilized for informal assessment of students in vocational programs. The materials were then developed into a series of sixteen modules representing the seven service areas of vocational education. These modules will enable teachers to assess and identify some of the areas in which special needs students may encounter learning difficulties.

This project and the resulting modules are based on the assumption that one of the ways that vocational education can provide training "appropriate to the needs and progress of each ... individual," is to assess the needs of each individual. Another assumption is that "modifying" a vocational program may be done in many ways but cannot be done effectively until assessment of student needs has been completed. The modules will provide information that will enable vocational teachers to modify their materials or lessons based on the results of the assessment information.

Information which you obtain from the assessment may be used in the following ways:

grouping of students with similar instructional needs
placement of students in programs
modification of instructional materials
writing goals and objectives for the student
obtaining remedial help
as a model to devise your own materials
writing contracts for behavioral change
giving specific information to supplemental services or support staff for assisstance

Identification of learning problems clarifies the various level of abilities and the learning styles of students. This necessitates individualizing vocational programs and instruction.

The modules include basic academic skill assessment, motor skill assessment, and interest assessment.

The following vocational areas are included in the modules:

1) *Welding*
2) *Sheet Metal*
3) *Agriculture*
4) *Graphic Arts*
5) *Woodworking*
6) *Automotive*
7) *Autobody*
8) *Drafting*
9) *Health Occupations*
10) *World of Work*
11) *Food Preparation*
12) *Child Care*
13) *Distributive Education*
14) *Electricity*
15) *Horticulture*
16) *Business and Office Occupations*

The assessment of student abilities are important for success in the vocational classroom. The basic skills assessment includes Reading Skills, Listening Skills, Using a book to locate information, and Mathematics. The mathematics section covers many of the basic operations and applications of math that is needed in vocational classes.

The reading section offers paragraphs written at two different reading levels; the first paragraph being easy (4-8), the second paragraph more difficult (9-12). Those students who have trouble with both paragraphs will find it difficult to learn through reading.

As a result of the field testing comments, there are two areas which are only included in the module entitled, World of Work. These two areas are "Following Directions" and "Safety Warnings Quiz". They were judged too "easy" for inclusion in all modules. This module was written specifically for students in disadvantaged and handicapped programs.

Materials are color coded for ease of usage and efficiency.

Yellow - *Student Sheets*
White - *Vocational Awareness Questionnaire*
Salmon - *Matrices*
Green - *Teacher Materials*
Gold - *Class Scoring Sheets*

DAILY LIVING COMPETENCIES

PERSONAL CHARACTERISTICS

WORK APTITUDES

MOTOR SKILLS

MATRICES
SKILLS CHECK LISTS

DIRECTIONS TO THE TEACHER:

* This section is designed to assess capabilities that are not easily quantifiable. Therefore, you will use these as observation instruments.
* More than anything else, these are to be used as diagnostic tools to help establish goals and objectives.
* Using the matrices, observe the student over a period of several weeks in several different situations.
* There are many reasons for poor or below average levels of performance. These may include environmental influences and health, i.e., stress, nutrition, physical limitations. The matrices are merely a guide to reflect how well a student is doing in your area.

DIRECTIONS: Please check the level each student is at according to the following scale.

1. poor
2. below average
3. average
4. good
5. very good
6. n/a

STUDENT / MATRIX SKILLS CHECK LIST																	
DAILY LIVING COMPETENCIES:																	
Can give personal information																	
Money concepts																	
Transportation abilities																	
Job seeking skills																	
Completes work																	
Understands directional terms																	
Understands safety rules																	
Demonstrates cooperation with others																	
Punctuality																	
Attendance																	

DIRECTIONS: Please check the level each student is at according to the following scale.

1. poor
2. below average
3. average
4. good
5. very good
6. n/a

STUDENT																
	MATRIX SKILLS CHECK LIST															
PERSONAL CHARACTERISTICS:																
Grooming																
Personal Hygiene																
Physical Tolerance Full Workday																
Peer Relationships																
Self Confident																
Works Well Alone																
Works Well in Group																

DIRECTIONS: Please check the level each student is at according to the following scale.

1. poor
2. below average
3. average
4. good
5. very good
6. n/a

STUDENT / MATRIX SKILLS CHECK LIST

Follows Written Instructions												
Follows Verbal Instructions												
Follows Demonstration												
Retains Instructions												
Improves with Repetition												
Conceptualizes the Problem												
Follows Multi-stepped Instructions												
Uses good judgement												

READING SKILLS

DIRECTIONS TO THE TEACHER:

This instrument is designed to assess how well the student understands written materials. The skills are broken into vocabulary, (Question 1-5), main ideas; (Question 6), details or facts, (Question 7), and inference or logical deduction, (Question 8).

1. Have students read each paragraph and then answer the questions on the following page. The students may refer to the original paragraph while completing the questions. (Time: approximately 15 minutes).
2. Collect all sheets.
3. Correct worksheets.

   Vocabulary

   a. For each vocabulary word listed (Questions 1-5), the student should leave a definition or synonym that shows an understanding of the word as it is used in the sentence. Score vocabulary questions as one (1) point each. Five (5) is a perfect score; zero (0) means none are correct.

   Main Idea

   b. In Question Six (6) you will assign a score of 1-5. The score should be based on how completely the student comprehends the paragraph.
      1) little knowledge or comprehension
      2) some grasp of paragraph
      3) fair idea of paragraph's content
      4) good idea of paragraph
      5) description which tells what the whole paragraph is about

   Details

   c. In Question Seven (7) a full score, five (5) points, should be based on whether the student puts down the two important facts.
      1) any one fact in the paragraph
      2) any two facts in the paragraph
      3) one fact that answers the statement well
      4) one fact that answers the statement well and any one that is in the paragraph
      5) Two facts that answer the statement well

Inference

d. In Question Eight (8) you are looking for an understanding that goes beyond what is in the paragraph.

1) any attempt to answer

2) any answer that even addresses the question

3) some idea of an extension of the basic knowledge

4) 5) a good answer which shows an understanding of the implications of the question.

EXAMPLE: A few words which describe what a good title for the paragraph is about would receive a score of four (4).

4. Total the scores (1-8), for each paragraph.

EXAMPLE:

	Paragraph 1		Paragraph 2		TOTAL
Vocabulary	_____	+	_____	=	_____
Main Idea	_____	+	_____	=	_____
Details	_____	+	_____	=	_____
Inference	_____	+	_____	=	_____

5. Enter the score from each area and the total on the class scoring sheet.

6. Paragraph one was chosen for student who have lower reading levels. Paragraph two was chosen for students who read at the high school level.

CHILD CARE
READING SKILLS - I

READ THIS PARAGRAPH:

There are PERSONAL SERVICE careers which serve to help people in their DAILY living. Today, more and more people are employed who are trying to help SOLVE family problems. Thousands work in child care and PROTECTION areas. These careers are extremely important in today's society.

ANSWER THE QUEXTIONS ON THE NEXT PAGE

Robert M. Worthington, Careers: An Overview, Prentice-Hall, Inc., 1977.

NAME _____

CHILD CARE
READING SKILLS - I

DIRECTIONS TO STUDENT:

Please tell what the following words means as they are used in the previous paragraph.

1. PERSONAL _____

_____

2. SERVICE _____

_____

3. DAILY _____

_____

4. SOLVE _____

_____

5. PROTECTION _____

_____

VOCABULARY _____ (0-5)

6. What is this paragraph about? _____

_____

MAIN IDEA _____ (1-5)

7. Name two personal service areas you can work in.

(1) _____

(2) _____

DETAILS _____ (1-5)

8. Why are personal service careers so important? _____

_____

INFERENCE _____ (1-5)

TOTAL _____

CHILD CARE
READING SKILLS - II

READ THIS PARAGRAPH:

The newborn baby has almost no neck. The shoulders are narrow and SLOPING. The ABDOMEN is large and PROTRUDING, especially after feeding. The arms and legs, in proportion to the rest of the body, are short and thin, and the hands and feet are very small. The toes and fingers have well-developed nails even when the baby is born a month or two ahead of the expected time. Quite often there is a heavy growth of FINE-TEXTURED hair on the baby's head, back, and arms. This is PRENATAL hair that disappears soon after birth.

ANSWER THE QUESTIONS ON THE NEXT PAGE

Elizabeth B. Hurlock Ph.D., Child Growth and Development, Webster Division, McGraw-Hill Book Company, 1978.

NAME_____

CHILD CARE
READING SKILLS - II

DIRECTIONS TO STUDENT:

Please tell what the following words mean as they are used in the previous paragraph.

1. SLOPING_____

2. ABDOMEN_____

3. PROTRUDING_____

4. FINE-TEXTURED_____

5. PRENATAL_____

VOCABULARY_____
(0-5)

6. What is this paragraph about?_____

MAIN IDEA_____
(1-5)

7. Name two parts of the newborn baby's body which are short and thin:
   (1)_____
   (2)_____

DETAILS_____
(1-5)

8. What are some of the differences between growth of a newborn baby and a child?_____

INFERENCE_____
(1-5)

TOTAL SCORE_____

LISTENING SKILLS

DIRECTIONS TO THE TEACHER:

This test is designed to indicate how well your students use their auditory skills. They will be listening to a passage that is read two times. Then they will fill in the missing words on the answer sheet.

In order to utilize the Listening Skills Unit, the listening skills paragraph needs to be taped or read to the students by you.

Please read the directions on the student sheets to the class. The students may write on their answer sheets at any time during the two readings. The students should be asked to read the test sheet before listening to the tape.

GRADING:

The number correct is the total number of correct words filled in the blanks. Please accept reasonable substitutes for the words. Overlook poor spelling.

CHILDCARE
LISTENING SKILLS

From the time children are born, there are observable differences in their general physical features. No two individuals are exactly alike, not even identical twins. Not only do infants have different features of the face, hair, and skin, but they are also unlike in their abilities and potentials. From the beginning of life, infants reflect differences in the ways they respond to the world about them. Contrasts in temperament can be seen in the child's level of activity, manner of withdrawal or attraction to something, amount of stimulation required to cause a response, and ability to change behavior. Of course, there are other differences, such as in learning patterns and attitudes.

Individuals feel, think, and act differently. Although developmental rates are similar, they vary from one individual to another. Each person is unique even though, in general, all are somewhat alike in stature and share the same needs for survival.

PARAGRAPH TO BE READ OR TAPED

CHILD CARE
LISTENING SKILLS

ANSWERS

How Children are Different:

1. As soon as they are born children have different physical features.
2. No two are exactly alike. Not even twins are the same.
3. They have different features of the face, hair and skin.
4. They are also unalike in their abilities and potential.
5. They reflect differences in the way they respond to the world.
6. There are contrasts in activities and manner of withdrawal or attraction to something.
7. They have different abilities to change their behavior.

LISTENING SKILLS

DIRECTIONS TO STUDENT:

You will hear a passage read from the book just mentioned. The passage will be read once quickly and then again slowly.
Listen carefully to the passage each time it is read. As you listen to the passage being read fill in the blanks. You will fill in the facts that you hear on your answer sheet.

READ YOUR SHEET THROUGH BEFORE LISTENING TO THE TAPE.

NAME _____

CHILD CARE
LISTENING SKILLS - Student Worksheet

How Children are Different:

1. As soon as they are born children have different _____ features.
2. No two are exactly _____. Not even _____ are the same.
3. They have different features of the _____, hair and _____.
4. They are also unalike in their _____ and potential.
5. They reflect differences in the way they _____ to the world.
6. There are contrasts in activities and manner of withdrawal or _____ to something.
7. They have different abilities to change their _____.

PARTS OF A BOOK

DIRECTIONS TO THE TEACHER:

Being able to locate information in a book is an important skill in most vocational areas. This test is designed to indicate the student's information locating ability in using a TABLE OF CONTENTS and an INDEX.

The student will use a table of contents and an index from your vocational area to answer five questions for each of the two areas. CAUTION students that the Table of Contents and/or Index may have more than one page. Ask students to check all pages before writing down their answers.

SCORING:

Correct the two parts and enter the total score on the class-scoring sheet.

Example:

Score - Table of Contents . . . . . _____

Score - Index . . . . . + _____

(0-10) _____

CHILD CARE
PARTS OF A BOOK

ANSWERS:

Table of Contents

1. page(s) 182
2. page(s) 217
3. page(s) 131
4. page(s) 198
5. page(s) 102

Index

1. page(s) 207-208
2. page(s) 144-147
3. page(s) 50-51
4. page(s) 198,255
5. page(s) 211,215

PARTS OF A BOOK

DIRECTIONS TO THE STUDENT:

There will be two parts to this section.

Using a Table of Contents
Using an Index

*Answer the Table of Contents questions by using the Table of Contents that follows.

*Answer the Index questions by using the Index that follows.

NAME_____

CHILD CARE
PARTS OF A BOOK

TABLE OF CONTENTS:

Using the table of contents answer the following questions.
On which page(s) would you look for:

1. What young children talk about?	1. page(s)_____
2. Personality building?	2. page(s)_____
3. Being a babysitter?	3. page(s)_____
4. Intellectual differences?	4. page(s)_____

MATHEMATICS TEST

DIRECTIONS TO THE TEACHER:

This test is designed to assess skill areas that might be needed in a vocational class.

The skills cross vocational areas.

The first ten questions comprise a basic skills assessment. The rest of the test uses various kinds of skills in diverse mathematical areas.

A student should not spend too much time on any one problem. He/she should be given extra time if necessary.

1. Allow one hour for students to complete this test.
2. Score the answers on the students' test.
3. Subtract the number missed from forty-two (42).
4. Enter the score on the class scoring sheet.

It is easy to tell which areas a student is weak in by referring to the test itself.

This is important when there are only a few wrong.

ANSWERS

5c. Subtract: 15.63 from 18.5

d. Subtract:
3 meters 3.0 CM
-2 meters 55 CM

5c. _____

5d. _____

6a. 12
x 3

b. 429
x306

6a. _____

6b. _____

7a. $5\overline{)25}$

b. $26\overline{)2782}$

7a. _____

7b. _____

8a. $7 \times 2\frac{1}{2}$

b. $1\ 3/4 \times 2\frac{1}{4}$

8a. _____

8b. _____

9a. $6\frac{1}{4} \div \frac{1}{4}$

b. $7\ 5/8 \div 1\ 7/8$

9a. _____

9b. _____

10a. .06
x.05

b. 10.2
x .37

10a. _____

10b. _____

10c. _____

10d. _____

c. $8\overline{)64.8}$

d. $2.50\overline{)17.5}$
